The Bstar Staff Value Program (SVP) shows business owners how to introduce and maintain a working environment that:

- improves business performance (ie. profits and business value)
- improves staff motivation & retention
- makes it easier to attract 'the right people'
- is easier to administer

Key features include:

- assisting the business owner/management team in determining the corporate targets that the business should be aiming for
- creating an environment where every staff member is focussed on achieving/exceeding these corporate targets
- identifying areas of staff dissatisfaction
- demonstrating to staff that they can achieve their career aspirations and professional development with the business
- showing business owners/management how to effectively let staff members 'know what is going on' in the business
- how to properly structure meetings
- how to fairly reward those staff members who contribute the most to improved business performance
- support to help the business owner launch the SVP
- providing the documentation and various templates to help the business owner/management team maintain the SVP
- providing ongoing support as required
